Takeover deal between DFNN, Fastech hits a snag

Singapore business ranks proposal

SINGAPORE — A proposed takeover of Singapore's largest internet service provider (ISP) by a consortium of two Hong Kong-based companies has hit a snag. The deal, which would see the formation of a new entity, has been delayed due to regulatory hurdles and the need for further approvals. The consortium, led by a major player in the region, has expressed its intent to strengthen its position in the market, but the process has been slower than anticipated. The deal involves a complex set of financial and legal arrangements, and the companies involved are currently in discussions with relevant authorities to resolve the outstanding issues. The delay has caused concern among investors and stakeholders, but the companies remain committed to completing the transaction.

Seeing and thinking beyond technology

By David Huxford

As the technology industry continues to grow, companies are looking for ways to stay ahead of the competition. One way to do this is by looking beyond technology and focusing on the customer. This means understanding the customer's needs and wants, and then creating products and services that meet those needs and wants.

Fragile balladry, mutant folk pop

THEY'RE THE ONLY TWO bands in the indie scene who can't seem to get a record deal. The reason? They're too good. The two bands are the New York City-based **DEAR JOHN** and the Los Angeles-based **THE PAPER KITES**. Both bands have been playing live for years, but their recordings have been largely ignored by the major labels. The reason for this is simple: they're too good. Their music is a perfect blend of folk, rock, and pop, and it's all done with a delicate touch. It's a shame that the major labels haven't noticed them yet, because they're truly one of the best things to come out of the indie scene in years.
